

Goal:

Sprint 4:

1. "As a Groupify user, I want to see who is in my currently joined group session"

Story Point Estimate: 13

Spikes:

- Spike: Must be able to see if another user is active on the same webpage as you

Tasks:

- Update who is in the Group Session window
 - Will involve having to check the groupSession table entry every x seconds
 - Display name and profile pics

Estimated Hours: 20

Who Is Interested?: Kaitlyn Spencer

2. "As a premium Spotify user, I want groupify's group session to be restricted for premium users only"

Story Point Estimate: 8

Spikes:

- Spike: Any non premium user can't access the group session feature

Tasks:

- Add a message (such as a popup) to notify user that feature isn't accessible to them

Estimated Hours: 5

Who Is Interested?: Ash

3. "As a Groupify user, I want my friends to only join my group session if I am on the page as well"

Story Point Estimate: 13

Spikes:

Tasks:

- Possibly make url is only reachable if host is on it
- That may bleed into the scenario in which the host leaves, everyone is kicked?

Estimated Hours: 15

Who Is Interested?: Ash, Zack, Kaitlyn

4. "As a Groupify user, I want to be able to sync with the host, pause a song, or skip to the next song."

Story Point Estimate: 13

Spikes:

- Spike: Must be able to sync listening time with current host time

Tasks:

- Sync button with loading icon for slow syncs
- Pause button
- Skip button

Estimated Hours: 60

Who Is Interested?: Ash, Spencer, Zack

5. "As a Groupify user, I want to be able to queue songs and see what songs are currently in a queue for the group session, despite if I am host or not"

Story Point Estimate: 5

Spikes:

- Spike:

Tasks:

- Will involve having to check the queue table entry every x seconds
- Make the host and user's play the next song on the queue after current song ends #add_to_queue(uri, device_id=None)
- Add buttons to play a song from the queue instantly, and buttons to remove songs (Host privilege only?)
- Be able to know who added the song to each queue. (stretch)

Estimated Hours: 25

Who Is Interested?: Hannah Spencer

6. "As a Groupify user, I want to see all my playlists, not just the initial few shown on my profile page"

Story Point Estimate: 1

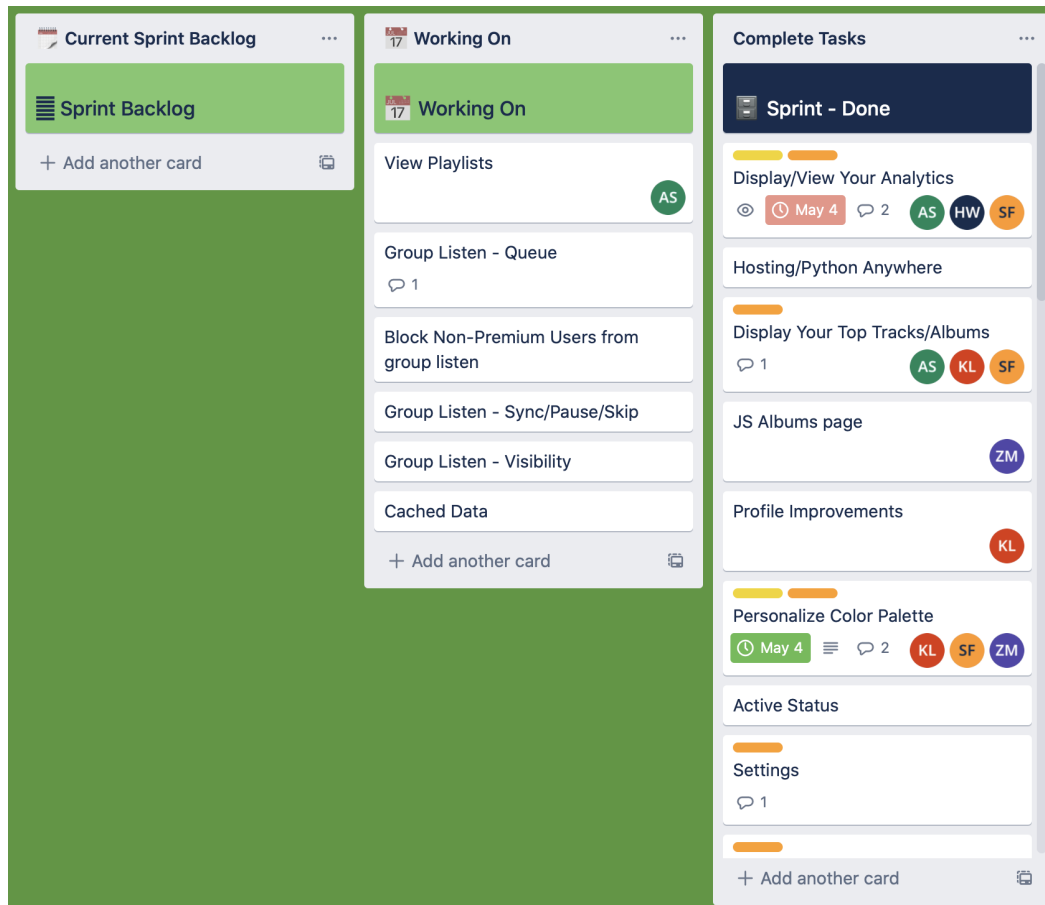

Spikes:

Tasks:

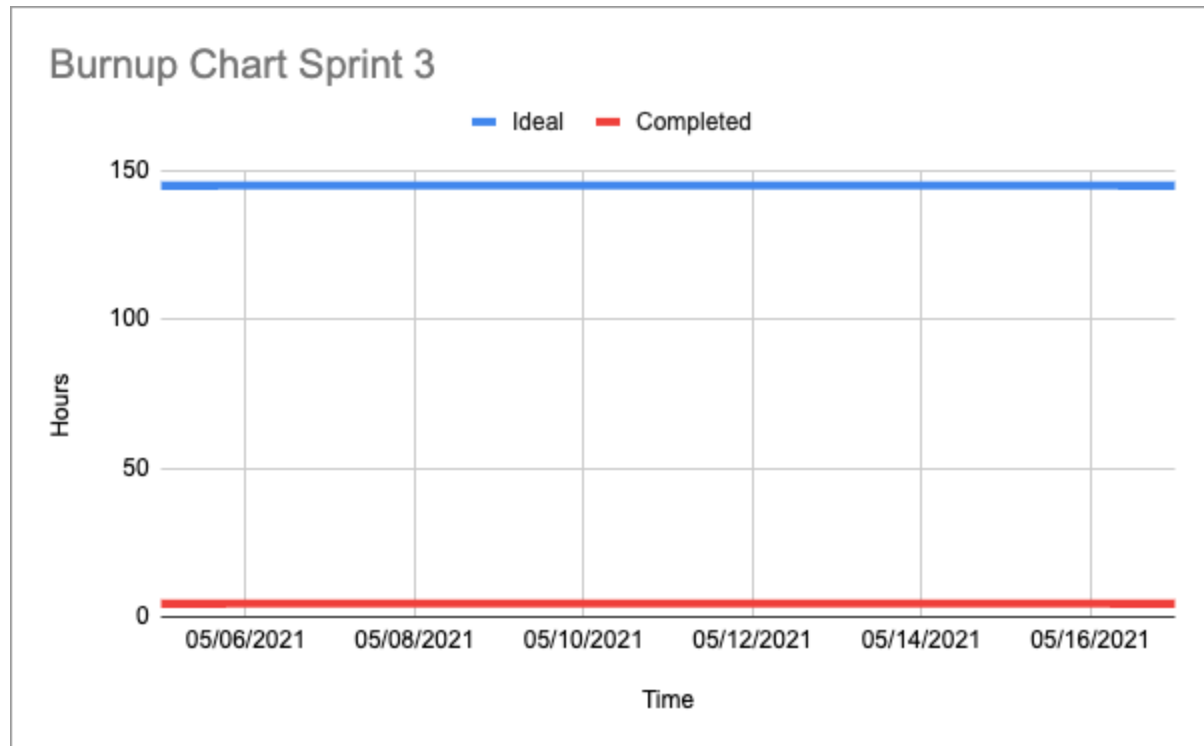

- Implement same method as showing all songs/artists

Estimated Hours: 2
Who Is Interested?: Zack

Initial Scrum Board:

Initial Burnup Chart:
