

# Sprint 3 Report

**Product Name:** Groupify

**Member Names:** Ashkan Shams, Hannah Wong, Kaitlyn Liao, Spencer Fulgham, Zachary Miller

**Date:** 05/18/21

## Actions to Stop Doing

- Stop writing messy code

## Actions to Start Doing

- When needing help on something, try to schedule a specific time with someone.
- Working in pairs on difficult tasks, if needed
- Get in the habit of following our style guide off the bat

## Actions to Keep Doing

- Meeting MWF for 15 minutes to keep everything organized and everyone on the same page in terms of workload
- Maintain the 3 questions in the daily scrum meeting.
- Meeting tuesday nights to work on documentation and push to our dev branch
- Make it clear what user stories each team member wants to focus on.
- Continue to push any progress made to your branch.
- Having different text channels for the different user stories so communications can be organized and compartmentalized
- Ordering code in a more readable and easily findable way
  - fixing what github did
  - Comment lines to modularize functions
  - English words to explain each code block

## Work Completed/Not Completed

Completed:

- "As a Groupify user, I want to be able to access the app online so i can use all the cool features."
- "As a Groupify user, I want to be able to recommend albums to people who view my profile, and be able to easily customize that list."
  - Completely redesigned the album editor page, with it now using Javascript to store the albums. We also implemented a drag and drop feature, making the page much more user-friendly.
- "As a Groupify user, I want my profile to display my Spotify profile's public information, such as my playlists, my top artists, and what genres I enjoy"
- "As a Groupify user, I want my friends to see a custom active status when I am online"

Not Completed:

- "As a Groupify user, I want to be able to edit my profile easily and intuitively"
  - Edit profile toggle button was not implemented as we prioritized work on group listen above it, but all functionality to edit your profile is implemented, just no defined "edit profile" mode
- "As a Groupify user, I want to be able to listen to music through Groupify's music player with my added friends, and join in listening rooms with my friends"
  - Many of the functions needed for group listen are implemented, and the page is progressing, but there are many many steps to this user story, of which will continue into sprint 4

## Work Completion Rate

User Stories Completed: 4/6

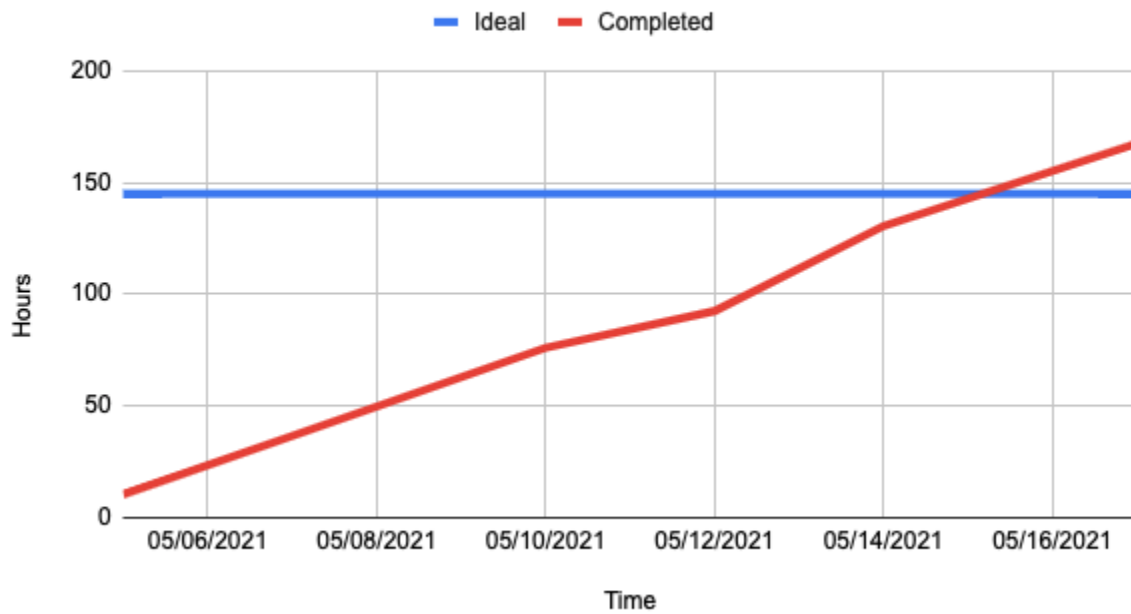

- Group Listen is a big hurdle, but is assuredly progressing

Number of ideal work hours during sprint: 145 total

Number of days during sprint: 14
