

## Goal:

### *Sprint 3:*

**1. "As a Groupify user, I want to be able to access the app online so i can use all the cool features."**

Story Point Estimate: 21

Spikes:

- Spike: Investigate how to host with AWS.
- Spike: Make sure all resources work for all the platforms we want (browsers, devices)
- Spike: Investigate how to use Docker for hosting

Tasks:

1. Host with AWS

**Estimated Hours: 60**

**Who Is Interested?: Kaitlyn, Zack, Spencer, Ash**

**2. "As a Groupify user, I want to be able to recommend albums to people who view my profile, and be able to easily customize that list."**

Story Point Estimate: 14

Spikes:

- Spike: Allow multiple users to be seen and present on the same page

Tasks:

1. Hook up js and figure out Zack's album page
2. Pass albums to js, make images display
3. Add function to save all albums at once, treat the entire album list as one editable list.
4. Stretch: add drag and drop

**Estimated Hours: 5**

**Who Is Interested?: Zack, Ash**

**3. "As a Groupify user, I want my profile to display my Spotify profile's public information, such as my playlists, my top artists, and what genres I enjoy"**

Story Point Estimate: 4

Spikes:

- Spike: Find how to display playlists, top artists, and genres.

Tasks:

1. Look through SpotiPy documentation and functions

**Estimated Hours:** 10

**Who Is Interested?:** Hannah, Ash

#### **4. "As a Groupify user, I want to be able to edit my profile easily and intuitively"**

Story Point Estimate: 4

Spikes:

- Spike: Clean up layout, make look and animations consistent

Tasks:

1. Discuss improvements to web app and make changes
2. Add more animations, label, and transitions
3. Start having outside users test UI/UX of website

**Estimated Hours:** 5

**Who Is Interested?:** Kaitlyn, Spencer

#### **5. "As a Groupify user, I want to be able to listen to music through Groupify's music player with my added friends, and join in listening rooms with my friends"**

Story Point Estimate: 21

Spikes:

- Spike: Figure out how the playback works with the API, and how to integrate that into our group page
- Spike: Allow multiple users to be seen and present on the same page
- Spike: Have every user on the page listening to a song at the same time

Tasks:

1. Add song image and listening attributes
2. Add friends image to group listen panel (scattered around somehow)
3. Display song and queue
4. CSS the end path up all pre -tty

**Estimated Hours:** 60

**Who Is Interested?:** Hannah, Ash

#### **6. "As a Groupify user, I want my friends to see a custom active status when I am online"**

Story Point Estimate: 4

Spikes:

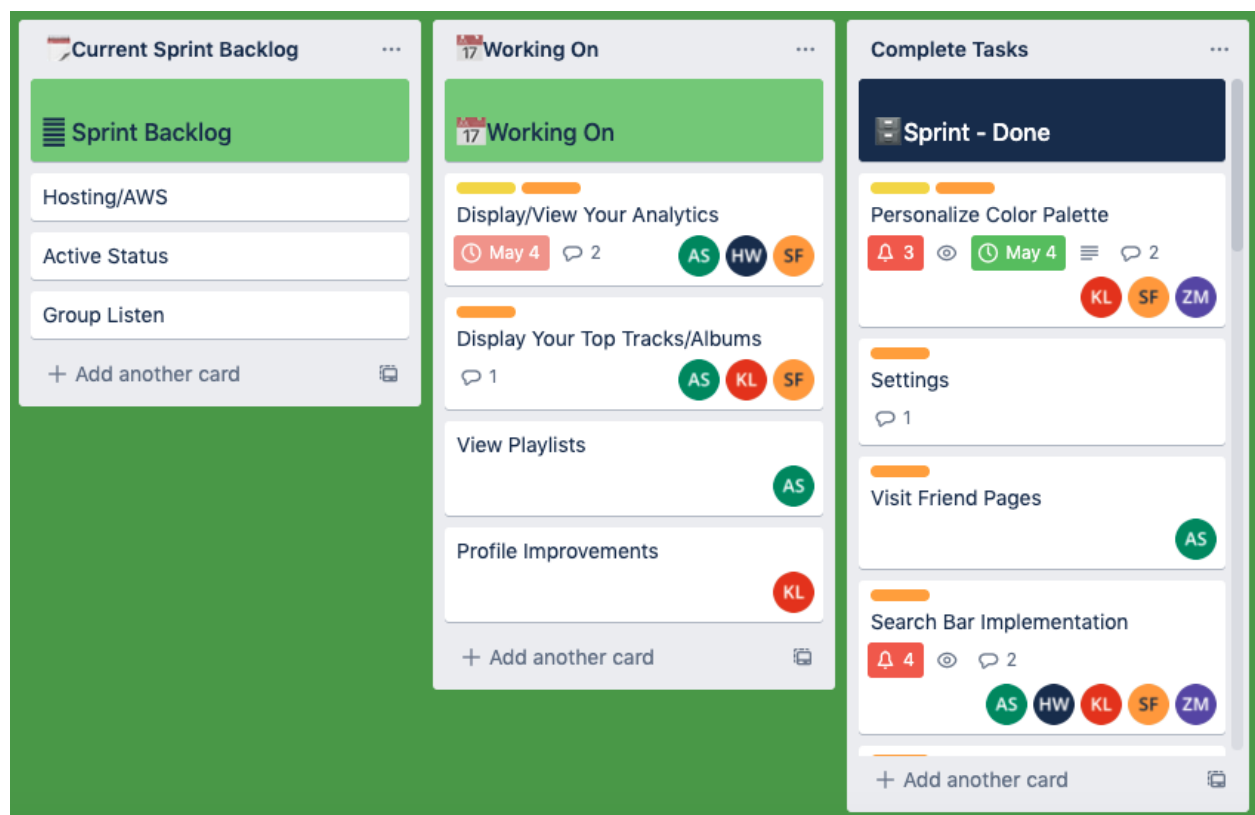

Tasks:

1. Create a active Field for both User and Friend database
2. Add a toggle for users to select if they are active or inactive
3. Add friend grabs the user's status so it gets displayed

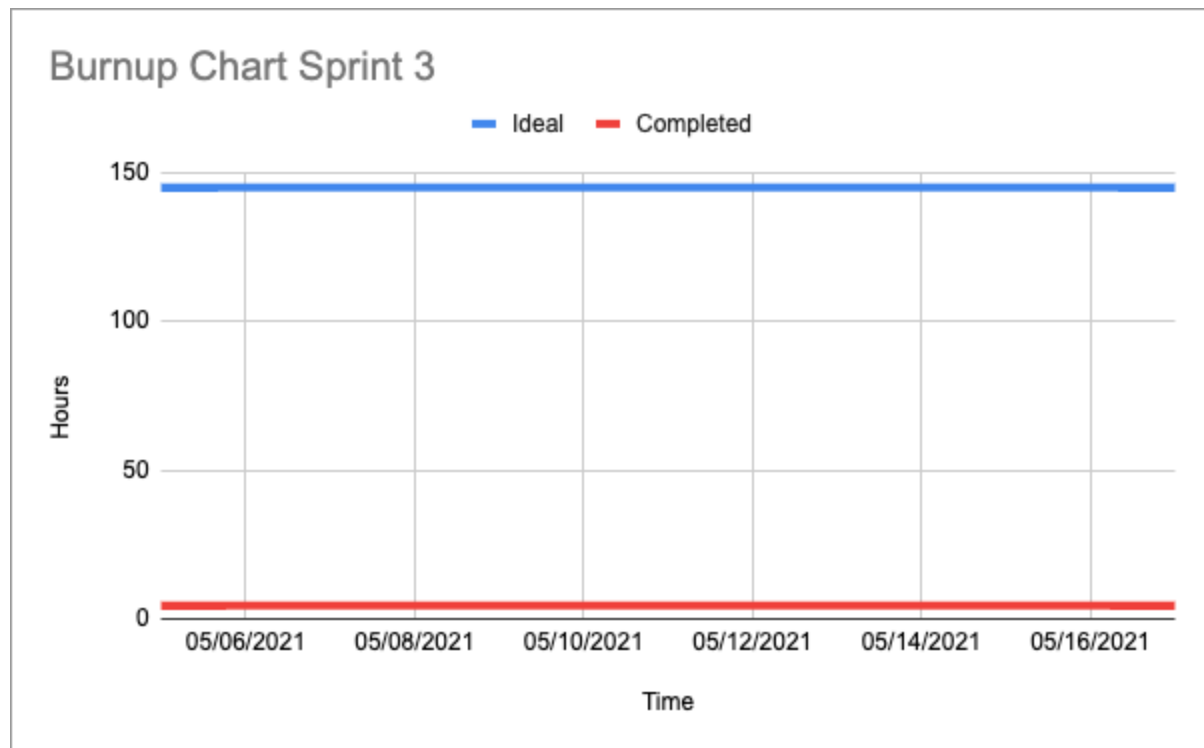

**Estimated Hours:** 5

**Who Is Interested?:** Hannah, Kaitlyn
