

# Sprint 2 Report

**Product Name:** Groupify

**Member Names:** Ashkan Shams, Hannah Wong, Kaitlyn Liao, Spencer Fulgham, Zachary Miller

**Date:** 05/4/21

## Actions to Stop Doing

- Working on old versions of the app when there are new updates available.

## Actions to Start Doing

- Meet at 5-6pm on Tuesdays as opposed to 6-7pm.
- When needing help on something, try to schedule a specific time with someone.
- Ordering code in a more readable and easily findable way
  - fixing what github did
  - Comment lines to modularize functions
  - English words to explain each code block

## Actions to Keep Doing

- Meeting MWF for 15 minutes to keep everything organized and everyone on the same page in terms of workload
- Maintain the 3 questions in the daily scrum meeting.
- Meeting tuesday nights to work on documentation and push to our dev branch
- Make it clear what user stories each team member wants to focus on.
- Continue to push any progress made to your branch.
- Having different text channels for the different user stories so communications can be organized and compartmentalized

## Work Completed/Not Completed

Completed:

- "As a Groupify user, I want to be able to see my top listened to tracks so that I can gain insight on my own music taste."

- "As a Groupify user, I want to be able to visually change my profile so that it matches along to the aesthetic of my music tastes, and remain that way when I log out and back in."
- "As a Groupify user, I want a settings page to determine the information about myself others can see, and I want my settings to be saved so I don't have to set them every time I log in."
  - Meets our definition of done for the current sprint, but it is possible more settings could be added later if desired.
- "As a Groupify user, I want to be able to create a bio and other unique profile features so that other people can see it"
- "As a Groupify user, I want to be able to add friends so that I can see their profiles"

Not Completed:

- "As a Groupify user, I want users to be able to search for songs using Spotify so I can add it to my profile."
  - This user story is very close to completion. Search functionality is working (the most challenging aspect), and users can use it to edit their profiles. However, despite its functionality, we want it to be more user friendly. While we find it easy to use, a new user may not understand how to use it.

## Work Completion Rate

User Stories Completed: 5/6

- One user story is functional but needs to be more user friendly.

Spikes Completed: 2/2

- Progress on Sprint 3 Spikes has been made as well.

Number of ideal work hours during sprint: 130 total (13 hrs per person per week)

Number of days during sprint: 14
