Groupify Javascript Style Guide

1. No digits in variable names or function names

2. Function definitions must use camelCase formatting.

3. Variables must use camelCase formatting.

4. Each function must have a comment above it explaining its general purpose.

5. No lines are beyond 100 characters long.

6. Every axios GET or POST must wait for the axios call to finish with '.then()' before manipulating data.

7. Opening brackets must be on the same line as the if or for statement using it.

8. Closing brackets must be on their own line.

9. Comments are placed above the piece of code being explained, not to the side.

10. Single line comments have a space after the double slashes.
